Biomass supply (PJ)

Biomass utilization (PJ)

The chart illustrates the projected electricity generation capacity in the UK from 2015 to 2070. The capacity is shown in stacked bars for each year, with the total capacity increasing significantly over time. The legend identifies the following energy sources contributing to the capacity:

- wind onshore
- solar PV
- solar CSP
- nuclear
- natural gas (CC)
- hydro
- heavy fuel oil
- coal
- biomass

The chart shows a clear trend of increasing capacity, with a significant portion of the growth in the later years (2050-2070) being attributed to wind onshore and solar PV. The capacity in 2070 is projected to be the highest, exceeding 100 GW.

The chart displays the projected number of people aged 65 and over in the EU from 2015 to 2070. The total number of people aged 65 and over is projected to increase significantly over time, with a growing proportion being non-EU citizens. The chart is divided into two main categories: EU citizens (blue) and non-EU citizens (yellow). The non-EU citizens are further divided into EU citizens (blue) and non-EU citizens (yellow). The chart shows a significant increase in the total number of people aged 65 and over, with a growing proportion being non-EU citizens.

Year	EU citizens (blue)	non-EU citizens (yellow)	Total (blue + yellow)
2015	~1.5	~0.5	~2.0
2020	~2.0	~0.5	~2.5
2025	~2.5	~0.5	~3.0
2030	~3.0	~0.5	~3.5
2035	~3.5	~0.5	~4.0
2040	~4.0	~0.5	~4.5
2045	~4.5	~0.5	~5.0
2050	~5.0	~0.5	~5.5
2055	~6.0	~0.5	~6.5
2060	~7.0	~0.5	~7.5
2070	~8.0	~0.5	~8.5
