The chart illustrates the projected growth of the elderly population in the EU. The total number of people aged 65 and over is projected to increase from approximately 10 million in 2015 to over 100 million in 2070. The most significant increase is in the 65-69 age group, which grows from a very small fraction to nearly 40 million by 2070. The 70-74 age group also shows substantial growth, reaching about 30 million. The 75-79 age group grows to about 10 million, while the 80-84 age group reaches about 5 million. The 85-89 age group grows to about 2 million, and the 90-94 age group reaches about 1 million. The 95+ age group remains the smallest, growing from a negligible number to about 0.5 million by 2070.
